

AI Dictation Consent Form

Patient Name: _____

Date of Birth: _____

Date: _____

Purpose of AI Dictation

At Orthopaedic Specialists of North County, our providers may use secure, HIPAA-compliant artificial intelligence (AI)–powered dictation tools to assist in creating clinical notes and documentation. These tools help improve accuracy and efficiency while allowing your provider to focus more directly on your care.

How AI Dictation Works

- Your provider may speak notes aloud during or after your visit.
- Speech is transcribed using an AI-assisted dictation system.
- The dictation tool **does not make medical decisions**; it only converts spoken words into text.
- All notes are reviewed, edited, and approved by your provider before becoming part of your medical record.

Privacy & Security

Orthopaedic Specialists of North County uses AI dictation tools that follow strict privacy and security standards, including HIPAA compliance.

- Audio recordings are stored beyond what is required for transcription (Up to 90 days).
- Your identifiable information is protected in accordance with federal and state laws.
- Your information is **never used to train AI models** or shared outside approved systems.

Your Rights

- Your care will not be impacted if you decline consent.
- You may withdraw your consent at any time by notifying staff or your provider.
- You may request more information about how AI dictation is used in your documentation.

Consent

By signing below, you acknowledge and consent to the use of AI-powered dictation tools during your care at Orthopaedic Specialists of North County.

I have read and understand the information above. I authorize Orthopaedic Specialists of North County to use AI-assisted dictation tools for clinical documentation related to my medical care.
